

## The Annual Quality Assurance Report (AQAR) of the IQAC

All NAAC accredited institutions will submit an annual self-reviewed progress report to NAAC, through its IQAC. The report is to detail the tangible results achieved in key areas, specifically identified by the institutional IQAC at the beginning of the academic year. The AQAR will detail the results of the perspective plan worked out by the IQAC. (Note: The AQAR period would be the Academic Year. For example, July 1, 2012 to June 30, 2013)

### **Best Practice- 1**

**Title of the Practice:** Workshop for students on 'Fruits and vegetable Processing and Preservation Techniques'.

**Goal:** To make aware the students with fruit processing and preservation techniques.

To make use of available fruits in the surrounding areas in order to encourage farmers to produce horticultural crops.

To develop self- employability skills.

**Context:** Most of our students come from farmer background. Many of the farmers practice production of fruit crops like pomegranate, banana, oranges, ber, amla, lemon etc. As most of them are producing the same crop they face price constrains as same produce comes in the market at the same time. Sometimes even cost of transportation is not gained by selling the fruits. Our students as young blooming farmers shared this issue with the teachers. Department of Botany runs a COP course in Horticulture Technology, teachers in the department decided to conduct workshop on the processing and preservation techniques of fruits and vegetables for selected students.

**The Practice:** In collaboration with the Horticulture Department, Aurangabad five days workshop on 'Fruits and vegetable Processing and Preservation Techniques' was conducted by Department of Botany. The experts from the team gave training for preparation of Jams, Jelly, Ketchup, Sauce, Squash, and Pickles etc. by using locally available fruits and vegetables. They were given detailed notes also. The packaging methods for preserved fruits were also taught. Queries of students were also solved through discussion.

**Evidence of success:** In the workshop about 100 students participated, many more were denied admission due to space problem. The participants decided not to stop producing fruit crops which they had shared before. They got encouragement to start their own business as they have raw material available with them. The farmers and self- help groups approached the department to conduct similar workshop for them. This is the success in itself. In coming days we will be conducting similar workshop for the society.

**Problems Encountered and Resources Required:** For the workshop we had to deny admission to many students due to space problem. But to give proper training we decided to conduct two such workshops with help of trained and practicing students. The workshop was conducted by collecting nominal fee, the remaining expenditure was done through the funding of Horticulture Technology course. The other resources were also provided by Department of Botany and the college authority.

**Best Practice- 2**

**Title of the Practice:** Self-employment through Parlour training, Hand bags making training

**Goal:** To develop self- employability skills.

**Context:** Our College is located in semi- urban area. Due to good reputation and available facilities in the college more than 50% students are female. They come from surrounding villages, from poor background. We felt a need to provide self-employability skills in addition to education. As the attitude of parents regarding education for girls is still not developed, they send their daughters only till the girl gets married. We thought of giving such training which will help the girls to continue their education as well as get self- employed.

**The Practice:** The girl students were interviewed and selected on the basis of need and interest. The teachers approached beauty Parlour owner/ trainer and the Hand bag making trainers. Discussed the issue with them as the girls had interest in training but could not afford due to financial constraints. The trainers agreed to train our girls on concessional charges. The selected students attained their trainings after the college hours everyday for three months.

**Evidence of success:** Selected girls took the training successfully. They were issued certificates. Few of our girls started their own ‘Beauty Parlour’ in their village. The girls who were trained in Hand Bag making, stitched bags and sold them. We are planning to arrange for exhibition and sell for the hand made products by our girl students.

**Problems Encountered and Resources Required:** Due to unavailability of funding we could not train more girls. For this training the authority made funds available through ‘Equal opportunity funding’. Many more type of trainings available in the market but finance is the big problem. We are planning to make finance available so that we can train more girls for their upliftment.
